EXAMINER'S AMENDMENT

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.

The application has been amended as follows:

IN THE CLAIMS:

In claim 16, line 5, "fist" has been changed to --first--.

The above change has been made to correct typo.

Reasons for allowance

The following is an examiner's statement of reasons for allowance:

The instant invention is deemed to be directed to an unobvious improvement to a method for removing pollutants from the air over U.S. Patent No. Des.341,881 which teaches a method for removing pollutants from the air, comprising: (a) providing a fan having a fan blade having a surface; (b) providing a sheet having a first side and an opposite second side, (c) attaching said second side of said sheet to said surface of said fan blade so that said first side of said sheet is exposed to the air; and, (d) causing said fan blade to rotate through the air; and an air purification device for attachment to a fan blade having a surface, said air purification device comprising: a sheet having a first

Art Unit: 3745

side and an opposite second side, said second side of said sheet attachable to the surface of the fan blade so that said first side of said sheet is exposed to the air; and, so that as the fan blade rotates, said first side of said sheet collects pollutants from the air.

Regarding claims 1 and 29, the improvement comprises providing a plurality of sheets, each sheet of said plurality of sheets having a first side and an opposite second side, each said sheet having a tacky substance disposed upon said first side, said plurality of sheets arranged in stacked multi-layer relationship wherein said first side of each said sheet faces in a same direction, said plurality of stacked sheets having a top sheet and a bottom sheet, and each said sheet having a tab; attaching said second side of said bottom sheet to said surface of said fan blade so that said first side of said top sheet is exposed to the air; and, (d) causing said fan blade to rotate through the air.

Regarding claim 16, the improvement comprises a plurality of sheets, each sheet of said plurality of sheets having a first side and an opposite second side, each said sheet having a tacky substance disposed upon said first side, said plurality of sheets arranged in stacked multi-layer relationship wherein said first side of each said sheet faces in a same direction, said plurality of stacked sheets having a top sheet and a bottom sheet, and each said sheet having a tab; said second side of said bottom sheet attachable to the surface of the fan blade so that said first side of said top sheet is exposed to the air; and, so that as the fan blade rotates, said first side of said top sheet collects pollutants from the air.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Prior Art

Prior art made of record but not relied upon is considered pertinent to Applicant's disclosure and consist of four patents.

Matherne (Des. 306,198) is cited to show a method of removing pollutants from the air including the steps of providing a fan and attaching a filter to a blade of the fan but fails to teach using a tacky substance and a tab.

Kuryliw (5,341,565) is cited to show a method of removing pollutants from the air including the steps of providing a fan and attaching a filter to a blade of the fan but fails to teach using a tacky substance and a tab.

Antonelli (5,562,412) is cited to show a method of removing pollutants from the air including the steps of providing a fan and attaching a filter to a blade of the fan but fails to teach using a tacky substance and a tab.

Walker et al. (5,775,876) is cited to show a method of removing pollutants from the air including the steps of providing a fan and attaching a filter to a blade of the fan but fails to teach using a tacky substance and a tab.
